

➔ Overview of our company

Incorporated in 1990, Envex provides a variety of safety, health and environmental consultancy services. In addition we also provide training services for safety, risk assessments and the environment. Our experience includes small, medium and large enterprises and covers all market sectors from engineering to offices, from software to computers, from service industries to educational and governmental establishments.

Envex Company Limited is a wholly owned trading subsidiary of [PHSC plc](#), our parent company.

➔ Why choose Envex?

- Our consultants and staff have a wealth of knowledge with over twenty years of health, safety, occupational hygiene and environmental knowledge and experience
- Our consultants also are trained in risk management and understand wider issues of risk outside of health and safety, which gives you a more business-centered approach
- We are a flexible, client focused company able to provide practical cost-effective solutions from experience
- Consultants are trained in project management and are able to manage large health and safety projects
- National coverage.

➔ Envex's philosophy

- We explain why you can do things, rather than tell you all the reasons why you can't.
- We try to show how you can meet your objectives and at the same time give proper regard to both the criminal law, and your civil law duties towards other people.
- It's easy to keep spending on safety - we help you understand when you've gone as far as you need.

➔ Envex professional membership

Envex and their consultants are members of the following professional organisations:

- The Chartered Institution of Occupational Safety and Health (MIOSH)
- British Institute of Occupational Hygienists (BIOH)
- British Occupational Hygiene Society (BOHS)
- Institute of Risk Management (IRM)
- Chartered Institute of Environmental Health (CIEH):- Envex are training service providers for the Chartered Institute of Environmental Health, Centre Number H52368, and can deliver their courses to Envex clients.

What is Occupational Hygiene?

People at work can be exposed to a variety of hazards through their normal workplace activities. Hazards may include:-

- Chemicals in the forms of liquids, dusts, solvents, fumes and fibres
- Physical hazards such as noise, vibration and non-ionising radiation (UV light, lasers)
- Ergonomic problems such as manual handling, work tool use and workstation use.

Not effectively controlling these hazards can have a harmful effect on human health. The consequences may not appear until some time after the initial exposure. It is important to understand how best to protect and safeguard the health of your employees, your most valuable asset.

Why choose Envex?

- Over 20 years practical experience in occupational hygiene, health, safety and risk
- Envex experience covers all areas of the workplace and industry
- We are a flexible, client focussed company who will provide you with practical solutions from experience
- Complete service from monitoring, to problem identification, to bespoke solutions for your organisation.

Consultancy Services

We provide comprehensive, high quality occupational hygiene surveys to assess and control workforce exposure to hazardous chemicals and physical agents including noise, vibration and indoor air quality. Customers throughout the UK, Ireland and Europe receive the highest level of service and independent expertise from our highly trained, experienced and qualified occupational hygienists. Surveys are undertaken to assist compliance with legislation such as:

- Control of Substances Hazardous to Health (COSHH) Regulations 2002
- Noise at Work Regulations 2005
- Control of Vibration at Work Regulations 2005
- Control of Asbestos Regulations 2006
- L8: Legionnaires' disease: The control of legionella bacteria in water systems

Monitoring projects utilise the latest specialist equipment using Health and Safety Executive approved methods. Extensive analysis is carried out at our UKAS accredited partner laboratories. Our full range of services includes:

- Workplace air monitoring for dusts, vapours, fumes and gases
- Noise monitoring, assessment and control
- Hand - arm and whole body vibration monitoring and control
- Indoor air quality assessment and building health management surveys (e.g., building related sickness, lighting, asbestos management, air conditioning and ventilation)
- Local exhaust ventilation examination and testing
- COSHH assessments
- Asbestos services, covering identification, evaluation and costing, monitoring, site surveys, project and contractor management
- Legionella risk assessments, legionella audits and water sampling
- Site observations and practical advice on improvements to working practices
- Training and toolbox talks – at your location on-site or at our training centre

Our customers come from a wide range of industrial sectors, including manufacturing and service companies, construction, public sectors, charities and commercial organisations.
